

INSTAGRAM GALLERY FOR MAGENTO 2

USER GUIDE

Step: 1: Install the extension following the steps written in the extension installation Guide.

General Configuration

Step: 2: Log in to your Magento 2 admin panel and navigate to **Stores > Configurations > Folio3 > Instagram Gallery**

For Magento (1.x & 2.x) Design, Development & Customization please visit us at:
<https://ecommerce.folio3.com/magento-development-company/>

Step: 3: Expand the General tab & enable the extension by setting the “Enable” field to Yes.

How To Link Your Instagram Account to your Magento 2 store

Step: 4: Set the [Instagram Client Id](#)

Step: 5: Set the [Access Token](#)

Step: 6: Set the [Refresh Secret Token](#)

Step: 7: Set the [App Secret Token](#)

Step: 8: Set the Facebook App Secret Token

Step: 9: Set the Facebook Client ID

Step: 10: Set your Instagram Account Url

Once your Instagram account is linked to your Magento 2 store, it can be used on different pages & blocks.

How to create an Instagram Page:

Apart from adding it as a widget, we can directly create an Instagram page by using this extension for Magento 2.

Step:1: Expand the **Gallery Page Options** and fill out the required fields.

1- **Gallery Page Url:** Provide the URL that you want to have for your Instagram page.

2- **Gallery Page Title:** Provide the title of your Instagram page

3- **Gallery Page Description:** Any Description that you want to add below the Title of the page

4- **Layout:** This field provides two options for the layout:

Masonry:

Grid:

5- **Image Resolution:** The images can be displayed in different resolutions:

5.1 Low Resolution (320*320)

5.2 Standard Resolution (640*640)

5.3 Thumbnail (150*150)

For Magento (1.x & 2.x) Design, Development & Customization please visit us at:
<https://ecommerce.folio3.com/magento-development-company/>

6- **Number of Posts Limit:** This field provides the feature by which we can display the number of posts on the frontend. The maximum number of posts displayed can be 100.

7- **Number of Posts per Row:** This field restricts the number of rows to be displayed in a row. The maximum number of posts displayed in a row can be 6.

8- **Show Modal:** By using this feature, the images can be displayed in a modal

9- **Show follow us link:** By enabling this field, the **Follow Us** button can be displayed on the frontend

10- **Show Post Description:** By enabling this field, the description of the Instagram posts will be displayed

11- **Show Readmore:** By enabling this field, a plus sign is displayed with the posts that on clicking opens the original Instagram post in a separate window

Show Readmore <small>[store view]</small>	<input type="text" value="Yes"/> ▼ Select Yes to show readmore on frontend.

Cron Setting:

This feature allows you to keep your Instagram account data up-to-date on your website. A cron job is run to fetch the newly created posts

1- Frequency: This field provides three options for the cron to run:

- Daily
- Weekly
- Monthly

2- Start Time: Here you need to set the time at which the cron job should be started.

NOTE: If you have setup the cron but you want your website to fetch the images without waiting for the cron execution, simply hit the url in the browser: <https://{{website-url}}/instagram/runScript>

How To Add An Instagram Widget:

This extension for Magento 2 provides a feature where you can add an Instagram widget to your website's blocks and pages.

Step: 1: Navigate to the Content > Pages/ Blocks

Step: 2 : Navigate to the Content section of the page/block you want to add the Instagram Gallery to.

Step: 3: Click onto the Insert widget icon

Step: 4: Now, from the Widget Type dropdown, select **Instagram Widget**

Step: 5: Upon selecting this, **Widget Options** will be expanded.

Step: 6: Select all the options stated below:

- 1- **Title:** Provide the title of your Instagram page
- 2- **Description:** Any Description that you want to add below the Title of the page
- 3- **Widget Layout:** This field provides two options for the layout:
 - Masonry:
 - Grid:
 - Carousel:
- 4- **Image Resolution:** The images can be displayed in different resolutions:
 - 4.1 Low Resolution (320*320)
 - 4.2 Standard Resolution (640*640)
 - 4.3 Thumbnail (150*150)
